

SPORTS CENTER OF THE FUTURE

The Sports-Center includes two groups of structures:

I – covered structures which contain auxiliary premises: lobby, dressing rooms with showers and restrooms, halls with work out machines, rooms for physiotherapy, rooms for medical personnel, rooms for administrative and technical staff, conference halls, classrooms, as well as communication galleries which connect auxiliary premises with sports fields, swimming pools, skating rinks, etc.

II – sports fields, swimming pools, skating rinks, and other facilities for proper sports training. All of these facilities have adjustable coverings which can cover these facilities in accordance with outside conditions (temperature, precipitation, wind, sun radiation, etc)

This Sports-Center represents a growing complex. The quantity of all of the structures and facilities can increase with time.

A handwritten signature in black ink, reading "Viktor Mashinsky". The signature is written in a cursive, flowing style.
